=====

[1] The 48th Annual Training Course started

The 48th Annual Training on Seismology, Earthquake Engineering and Tsunami Disaster Mitigation courses started on October 3rd 2007. In this year, we invite 26 participants from 16 countries including a third-generation Japanese-Dominican who is invited by The Association of Nikkei & Japanese Abroad. Furthermore this is the first time for us to have a participant from Mozambique, where the earthquake of magnitude 7 hit in February 2006. These training courses will be carried out until September next year in cooperation with GRIPS and JICA. After getting through the courses with credits required, the master's degree will be awarded to the participants. So, we hope all 2007-08 participants will take the master's degree one year later.
